Fourth Fortnightly Crop Report From Dept. Of Agriculture

Crop conditions through the central part of the province have been considerably improved by rains during the past week, and in southern and northern sections there is satisfactory promise of a good crop, according to telegraphic reports received on Friday last by the Department of Agriculture for the fourth crop report of the season.

The prolonged drouth during the latter part of May and the first three weeks of June has considerably reduced the prospective yield over the area comprising the central part and in a few localities early sown wheat has been pastured or plowed down. Later sown crops, however, on breaking or summerfallow have been able to weather the dry period, and as a result of the recent rains will give a fairly good yield.

The southern part of the province has received sufficient rainfall to promote continued growth. An exceptionally good stand of fall wheat is reported and spring wheat and the coarse grains are coming along well. The first irrigation of the season has been completed and a start will be made with the cutting of the first crop of alfalfa during the coming week.

Slight injuries to crops and gardens is reported in a few localities as the result of frosts on June 19th and 24th. With the exception of limited areas, insect injury has been very slight.

Pastures are making better growth and the feed situation has been considerably improved by the past week's rains, and as a result dairy production will show an increase in many sections of the province.

The Peace River district in the majority of localities continues to show promise of a satisfactory crop.

A BROWN STUDY

Brown is a more restful and tasteful colour, the car designers and interior decorators of the Canadian Pacific Railway have decided, so this will be the predominant note in the sumptuous new sleepers just built by the company's Angus shops at Montreal especially for service on the Trans-Canada Limited. The carpets and curtains will be a rich brown, and the wood finish a lustrous walnut. Permanent headboards, too, will give added privacy, dividing each section from its neighbour cubicle fashion. The feature of the rear end equipment on the Trans-Canada will be a Solarium-lounge car, with green-tiled bath-rooms, vita-glazed sun rooms and smoking rooms for women as for men.

Local O.E.S. Chapter Hosts To Calgarians

About sixty members of Bow Valley Chapter, O.E.S., Calgary, were the guests of the local St. Hilda's Chapter Tuesday evening of last week, at the latter's last meeting before the summer holiday season.

After work the local chapter entertained the visitors with a varied program. Miss Laura Liesemer gave a number of piano selections, Miss Summers, violin, and Miss Saugstad, vocal. Lunch was served and a pleasant time spent in impromptu speeches, etc., brought a most pleasant evening to a close.

Tourists To Alberta Advance Party

Within the next month or so, thousands of motor tourists will be seeing Alberta on a scale that was never approached in previous times. The movement is northward, just as far as highways are passable in Sunny Alberta, and this is having the effect of pushing the frontier of settlement still further to the northward.

This holiday seeker movement is something more than a mere outing, in most cases. People from south of the line are taking advantage of the season to check upon the lurid descriptions drawn by over zealous immigration agents. Or it may be that they are desirous of measuring the degree of success attained by some friend or relative who emigrated to the Canadian west in bygone days.

Alberta is making appeals for new settlers, and new capital, these being fundamentals to its progress. It realizes that the tourist is the advance party, and much will depend on his report when he returns home.

Such being the case, Alberta residents, including farmers, townspeople and others, have a special duty to make the tourists welcome this year. The fact that a big movement is in sight makes it highly important to see that these visitors go away with abundant praises for this land of promise.

Towns should take steps now to see that their auto camps are in first-class shape, that all essential services are readily available.

Farmers living on routes where there are long jumps from one town to another can play their part in boosting Alberta to the tourists by having camping facilities within easy access. Much can be done in this way to swell the future tourist traffic in this province, while also paving the way for future settlers.

The Alberta Motor Association is fully cognizant of the importance of tourist traffic to this province. The association has made a strong appeal to the government for highway building on the largest scale possible, as it had in mind the obvious importance to this province of attracting motor visitors from afar. Its efforts along this line can be made all the more effective by full co-operation on the part of farmers and others living in this province.

W. Cathrow of the Royal Bank staff spent the week end and holiday at his home in Bassano.

Mr. and Mrs. E. G. Ranton and family motored to Edmonton on Sunday. Mr. Ranton and two daughters Dorothy and Margaret returned on Monday. The rest of the family are spending the summer holidays at Cooking Lake.

Public School Promotions For Year Ending June 30

Passed from Grade 7 to 8—Jim Fooks (honors), Goldwin Gabel, Helen Moon, Steve Wesley, Gerald Boettger, Lena Bishop, Harold Shiels, Ruby Kercher, Aylmer McMow.

Recommended—Tom Pearson, Agnes Pederson.

Failed—Frank Carlton, —C. R. Ford, Principal.

Passed from Grade 6 to Grade 7—With Honors—George Boorman, Jean Lowrie.

Pass—Lorna Clarke, Annetta Shiels, Videlle Franklin, Eddie Carleton, Arthur Evans, George Royds, Gordon Dedels, Ronald Brightman, Irene Bellamy, Vera Matheson.

Failed—Fred Smith, Herb Carleton. —E. G. Evans, Teacher.

Passed from Grade 5 to Grade 6—With Honors—Arthur Boorman, Bobby Fooks, Willie Cummins.

Pass—Rita Scrutton, Florence Konshuk, Bruce Clarke, Clarence Cunningham, Bill Ranton, Jim Wright, Joe Graham, Warren Matheson, Maisie Sinclair, Evelyn McGhee, Gordon Caithness, Irene Kercher, Mary Wrigglesworth, Edwin McRae, Richard Walters, Jack Booker.

Failed—Alice Violette, Lorraine Durrer, Hector Lamont. —E. Evans, Teacher.

Passed from Grade 4 to Grade 5—With Honors—Cyril Sharman, Mary Newton, Vivian Caithness, Norma Sanderman, Helen Teskey, Harold Gulliver, Winnie Adshead, Harold Erb, Dorothy Dippel, Ethel Violette, Norman Crimmon, Orrie Franklin and Susa Wall (equal), Tommy Lamont, Orpha Gabel, Betty Cummins, Earl Dedels, Margaret Morrison, Dave Graham.

On Trial—Elwood Burroughs. Failed—Jim Lamont, Jim Sinclair.

Passed from Grade 3 to Grade 4—With Honors—Jossie Booker, Betty Paterson, Florence Chamberlin, Donald Phillipson, David Wright, Teddie Fooks, Russell Carleton, Murray Caithness.

Passed from Grade 3 to Jr. Grade 4—Gordon Cressman, Donald Lamont, Riley Moon, Frank Moon, Laurence Gabel.

—Vera H. Sexsmith, Teacher.

Passed from Grade 2 to Grade 3—Lois Edwards, Mildred Traub, Frances Clarke, Bobbie Wrightson, Betty Boorman, Alma Cunningham, Beth Graham, Muriel Brightman, Eleanor Powers, Stanley Goudie, Bobbie Modche, Albert Newton, Dorothy Sinclair, Myrtle Erb, Ruth Finlay, Lorna Carleton, Cecil Smith, David Walder, Rita Crimmon, Elbert Dedels, Beatrice Hayes, Bobbie Barrett, Lloyd Fischer.

Failed—George Kercher, Erna Fischer, Bertha Moon.

—A. Hugot, Teacher.

Passed from Grade 1 to Grade 3—Donald Cruikshank, Barney Paterson, Joyce Cummins.

Passed from Grade 1 to Grade 2—Mildred Cressman, Bennie Wyman, Veria Sanderman, Dorothy Konshuk, Harvey Stevens, Vera Sinclair, Maurice Boettger, Jack Edwards, Elizabeth Austin, Marcella Roper, Lois Cun-

WEDDINGS

PRICE—HALL

Knox United church was the scene of a quiet wedding on Monday, June 24, at 10 a.m., when Allie Opal Hall, daughter of Mrs. H. Violette of Didsbury, was united in marriage to Cecil Lawrence Price, son of Mr. and Mrs. O. H. Price of Hesketh, Alberta. Rev. George A. Dickson was the officiating clergyman.

The bride, who was given in marriage by her brother, was prettily gowned in a blue georgette ensemble trimmed with beige lace. She wore a brown fox fur and carried a bouquet of Columbia roses. Mrs. T. E. Clark, sister of the bride, acted as matron of honor, and H. L. Price, brother of the bridegroom, was the best man. Later, Mr. and Mrs. Price left by motor for the coast, and on their return they will reside at High River.

Didsbury Old Timers Re-Union Picnic

A large crowd attended the Didsbury District Pioneers and Old Timers Association second annual picnic on Wednesday afternoon last week in spite of the postponement earlier in the day owing to the rain.

M. Weber, President of the Association, gave the opening address which was followed by two excellent speeches by Dr. J. L. Clarke and H. B. Adshead, M.P., Calgary.

Clovermount and Rosebud staged an exhibition game of baseball, resulting in a win for the latter by the score of 7-6. J. V. Berscht had charge of the sports, which were run off without a hitch.

The following officers were elected for the ensuing year:

M. Weber, Pres.
W. G. Liesemer, Sec.
A. G. Studer, Treas.

MARRIED

Cecil Ellis Carver, youngest son of Mr. C. D. Carver, to Eleanor Wright, at the home of her parents at Loughheed, Alta., Thursday, July 4, 1929.

ningham, Clayton Dippel, James Rattay, Alice Tighe, Earl Cummins. Repeat—Lawrence Neufeld, Geraldine Crimmon, George Smith, Roland Cole, Eugene Durrer.

—R. Liesemer, Teacher.

Announcement

On and after the first of July this store will be operated on a cash basis. By doing so we will be in a position to give you lower prices on our usual line of Quality Hardware.

We solicit your future patronage which we have appreciated in the past.

Builders Hardware Stores, Ltd.
DIDSBURY, ALBERTA

Vacation Time

You'll soon be away by rail, boat or auto for your annual rest-up—

Your complete enjoyment on your vacation depends a great deal on the way you are prepared—

Here you'll find the right kind of Travelling Necessities

Trunks, Club Bags, Suit Cases. Kinds that the baggage-smasher can't hurt---

Prices \$1.95 and up

Tents

Our Bungalow Tents are very popular. No guy ropes to bother, easily and quickly put up. Lots of head and standing room.

Prices \$25.00 to \$60.00

Wall Tents priced from..... \$12.30 to \$25.00

Blankets

Take pure wool Point Blankets on your motoring trip. Twice as warm as ordinary blankets and take up very little room.

Priced from \$12.00 to \$18.00

Bathing Suits

Large stock of Pure Wool Bathing Suits including the famous "Jantzen" make—

Prices \$2.75 to \$5.75

"Where Quality and Price Meet"

Didsbury

Every package of Red Rose Tea is prepared with the same care—as if our reputation were to stand or fall upon that single package.

RED ROSE

TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good

In the best package—Clean, bright aluminum

Automobile Accidents

The summer months of July and August undoubtedly witness the heaviest automobile traffic throughout Western Canada. It is during this period that tourist traffic is greatest with "foreign" cars in large numbers from other Provinces and the United States crossing and re-crossing these prairies. They come from Provinces and States where traffic regulations frequently are different from those in force in these Western Provinces. During this mid-summer period, too, what we may term "domestic" traffic is at its peak. Roads are at their best, and following the closing of the schools many of our people tour "en famille," while week-end journeyings to summer resorts are much in vogue.

While care in driving is at all times necessary, and with the steady increase in the number of cars in use is becoming a more and more vital matter, it is nevertheless the case that during these summer months extra care should be taken.

There are certain factors to which special attention should be paid, and the importance of which are reinforced as a result of careful investigations into the cause of auto accidents carried out during a period of years. For example, one would naturally suppose that the majority of such accidents occur on bad roads, at intersections, curves, etc., but statistics prove that the majority of accidents occur on the so-called "safe" parts of the highways. Apparently drivers are careful on curves and badly surfaced roads, and let themselves go on straight, smooth stretches.

Statistics compiled in the State of Iowa in regard to accidents are certainly illuminating:

10,666 accidents occurred on straight-away stretches where the drivers of the colliding cars had a clear view of the objects with which they were colliding.

7,395 occurred at intersecting roads, most of which were due to the fact that one or both vehicles approached the intersections at speeds too great to be checked upon perceiving the approach of the second car.

3,566 were caused by failure to grant the right-of-way at street crossings.

940 occurred on curves, caused by the drivers of the two vehicles going in opposite directions "hugging" the "inside" of the bend in the road to help them maintain high speed.

1,169 resulted from driving on the wrong side of the road.

117 were caused by cutting corners.

1,788 were caused while ascending and descending hills.

The roads were in the following conditions:

15,000 roads were good; 593 were rough; 3,196 were wet; 483 were covered with snow; 1,018 were icy; 186 were sandy; 51 were muddy.

These figures seem to fairly establish the fact that the better the roads, the greater the number of accidents. In other words, where roads are not good, drivers are forced to exercise care, and because care is exercised accidents are reduced to a minimum notwithstanding that conditions existing would naturally predispose accidents, but where roads are good, drivers become careless, even reckless, and, sooner or later, the inevitable result is an accident.

With the present insistent demand everywhere for more good roads, and a still higher standard of good roads, coupled with the increasing power of cars and their enormous increase in number, the accident toll on highways is mounting higher and higher. The cause is the very reverse of what might have been expected. It is not defects in car manufacture, because cars themselves are stronger than ever before. It is not road conditions which presumably might ditch a car, overturn or damage it.

No, it is the human element that is responsible for the mounting toll of accidents. Instead of reaping the benefit of the vast improvements being made, drivers are becoming more and more careless, taking ever greater chances, becoming less considerate of the other fellow's rights, determined to secure "speed" at all hazards.

Think it over the next time you are tempted to "step on the gas for the sole purpose of seeing and boasting of what your car can do. It may do something you least desire and will forever regret.

Busy At Eighty-Two

At the death of 82, of Mrs. Flora Annie Steel, the great novelist of India, at Springfield, England, recently, she had just finished her autobiography, had half finished a novel, and had just published another, "The Curse of Eve," which gave her views on social problems.

Bicycles More Popular

Production of bicycles in Canada reached a new high level in 1928 at \$2,213,493. This was 52 per cent. above the previous record, that of 1926, of \$1,453,658, and 85 per cent. better than the \$1,194,471 reported for 1927. Three firms, all in Ontario, furnished the entire output.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Work On Branch Line To Mine

Commence Laying Steel On Line To Sherritt-Gordon Property

Commencement has been made on the laying of steel on the branch from Cranberry Portage to Sherritt-Gordon.

According to information, a very large gang under Peter MacKenzie, started laying the rails on the 55½ mile stretch. Work will be rushed on the steel laying and it is anticipated that trains will be running into Cold Lake by September 1st.

The opening up of the Cold Lake branch will see active development on many mining properties lying between Cranberry and Cold Lake.

NERVE TORTURES

A Condition From Which Both Men and Women Suffer

Hardly any condition of ill health causes more real suffering than a shattered nervous system. And often, unfortunately, but little sympathy is shown for the sufferer, from the mistaken notion that the nerves can be controlled. Men and women with nerves out of gear often become irritable and are blamed for ill temper, when it is not their fault. Their poor health is the cause. The tired, over-busy wife and mother, whose household cares have worn her thin; the breadwinner whose anxieties have worried him until he is really ill, are among the nerve sufferers who become run-down. Their nerves, like all bodily organs, need rich, red blood. In all such cases the best and simplest treatment is a course of Dr. Williams' Pink Pills, which enriches the blood and builds up the nervous system and brings good health and cheerfulness. Mrs. M. Cross, Richmond, Que., tells how this medicine ended her nervous troubles. She says: "I have suffered from nervousness and dizzy spells, and the hundred and one things which in such a condition make life a misery. The first thing I found to help me was Dr. Williams' Pink Pills. Under the use of this medicine I found my nerves grew steadier, the dizzy spells grew less frequent, and I became brighter and more cheerful. I took the pills for some time and found that they enrich the blood, build up the nerves and are a fine medicine for both old and young."

You can get these pills through any medicine dealer or by mail at 50c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Cars For Bolsheviks

Stated That Henry Ford Will Produce 900,000 Autos For Soviets

Henry Ford is to produce 100,000 cars a year for Soviet Russia under terms of a contract signed recently and made public in New York.

The contract will run for nine years and the factory will be established in Russia. Only the Ford passenger model "A" and the Ford truck model "AA" will be manufactured. More trucks than passenger cars will be produced.

The factory is to be located at Nizhni Novgorod, on the Volga river, and will be completed within four years.

After 10 Years Of Asthma Dr. J. D. Kellogg's Asthma Remedy proved the only relief for one grateful user, and this is but one case among many. Little wonder that it has now become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is earning it today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

Better Study Geography

The Saskatoon Star-Phoenix received a letter from the assistant editor of the National Geographic Magazine, Washington, D.C., in which reference was made throughout to "Saskatoon, British Columbia." If all the other information published in National Geographic is equally as accurate as the above, it is no cause for wonder that the Americans picture Canada only as a land of igloos and England as a country of beer mugs and plus-fours.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Exterminator.

It is complained that many business men write illegibly. A really busy man, of course, has not time to be constantly consulting a dictionary.

For sunburn—apply Minard's Lintment.

W. N. U. 1790

New Picture Film Invented

Can Be Made Of Cloth and Is Washable

The housewife of the near future may say to her servant: "Bridget, put those photos of father in the wash and hang them on the line to dry. Be sure to iron them tomorrow, for he is coming on a visit and I want them to look nice and fresh."

Exactly that can be done with a new kind of picture film invented by Dr. R. W. Hochstetter, head of the Hochstetter laboratories.

He is not using the invention for household purposes, but instead is applying it to produce new types of sound picture films, and radio transmission of sound, photos and motion pictures. Several new processes are involved.

The first is making photographic film out of cloth, so that it is washable, ironable and non-inflammable. He says that cotton, silk, linen or even paper can be used.

Along with the new film Dr. Hochstetter announces invention of a process for reflecting sound and pictures from the face of the films, instead of transmitting light through film. He also has a different method of amplification of sound, to get further away from distortion.

Machinery For Shearing

Hand Clippers Used In Australia Only On Pedigree Sheep

Australia's wool clip this season is estimated at about 900,000,000 lbs. from about 100,000,000 sheep. The great bulk of the shearing is done by machinery, although, in the case of pedigree sheep, hand-clippers are generally used to ensure a cleaner and more even cut. Wolseley, who invented the shearing machine, went to Australia from England in the middle of last century. He took up sheep farming soon after his arrival, and brought his first patent in 1874. With the machine shears now in use, an average worker can cut 100 fleeces per day, and totals up to 200 are fairly common.

MADE IN THE WEST

Paulins

Five Points For Britain

Has Designed, Equipped and Operated Fastest Modes Of Travel

It is certainly a most remarkable fact that at this moment the fastest aircraft in the world (the seaplane which won the Schneider Cup), the fastest craft on water (Miss England), the fastest motor car (the Golden Arrow), the fastest passenger liner (the Mauretania), and the fastest locomotive (a G. W. R. Express), are British all five—British designed, equipped, and operated. We are glad that the British government's exhibit at the Toronto National Exhibition this year will show five models to remind the world of it.

For Frost Bites and Chills. — Chills come from undue exposure to slush and cold and frost-bite from the icy winds of winter. In the treatment of either an excellent preparation is Dr. Thomas' Electric Oil, as it counteracts the inflammation and relieves the pain. The action of the oil is prompt and its application is extremely simple.

Mapping By Photography

The camera has been used by the Topographical Survey, Department of the Interior, as a means of gathering topographical data in the field for mapping purposes, for the last forty years.

Minard's Lintment for sick animals.

The amusing part of it, says the Farmer's Advocate, is that some of those city fellows who know how a farm ought to be run, plant a bag of potatoes and harvest a bushel.

6 Suggestions

Make Your Farm More Comfortable, More Livable and More Profitable with These Simple Spare-time Improvements

If you have any time on your hands here are six suggestions which will make an amazing difference in the attractiveness and efficiency of your farm.

First—Buy a supply of Gyproc Fireproof Wallboard. Then erect Gyproc partitions in your attic, changing the waste space into an additional room or two. Imagine how much more comfortable the family will be with the attic converted into a clean, inviting third story.

Second—Renovate the lower rooms by nailing Gyproc right over cracked and faded walls. You can decorate the flat, smooth Gyproc surfaces with Alabastine, paint or any other finish. And what a difference it will make to your home.

Third—Line your garage with Gyproc. Gyproc will make it fire-proof, cold resistant and a safer, more substantial home for your car.

Fourth—Gyproc your poultry house. Your flock will have better health, and year-long protection from fire, cold, heat and vermin.

Fifth—Line your grain bins, barns, stables and other buildings with Gyproc. By doing so you will make them more valuable, fire-safe, cold resistant and 50 per cent. more healthful for your stock to live in.

Sixth—Look about for cracked, warped or rotted walls, partitions and ceilings and repair with Gyproc. Such repairs are quick and inexpensive to make because Gyproc saws, nails and cuts so easily—saving time and labor.

CANADA GYPSUM AND ALABASTINE, LIMITED

GYPROC

Fireproof Wallboard

Development of Highways In the Three Prairie Provinces Presents Difficult Problems

Before the end of 1929 there will be between four and five thousand miles of permanent highway in the prairie provinces. The problems connected with road building on the prairies have not been few. In the first place, the area to be served with even the most ordinary roads, was so immense. One of the first efforts of a community is to cut out a road connecting it with town and school and during the pioneering years there is little further work done. Possibly a few logs are laid across a water hole and some dirt thrown over. The technical name for this sort of road is "corduroy"—the reason is obvious and one's sensibilities are "touched" by the corduroy road, whether manoeuvred by lumber wagon or motor car.

But with the increase in motor cars, and the consequent increase in motor travel, there was an insistent demand for better roads, roads that would be passable in all sorts of weather. It costs time and money to be held up for several days or weeks waiting for the roads to dry, so motorists, whether on business or pleasure bent, require all-weather roads.

Before the days of Government highways, and when all roads were under the jurisdiction of the municipal councils, some municipalities with a forward disposition made better roads than others. Some even put gravel on well graded and well drained surfaces, and so here and there would be a short stretch of permanent road. But the next municipality might have a council not interested in permanent roads, or, if so, wanted a road that ran north and south rather than one which went east and west connecting up with the road built by municipal "A." So these odd bits of good road helped not at all in the highway development of the province. It had to be a provincial government undertaking and a provincial plan, and an impetus was given by the grant offered to the provinces some years ago by the Dominion Government and based on the standard of road. So an effort has been made to overcome the difficulties of roadmaking in alluvial silt in one place, or wheat growing gumbo in another, or forest covered areas with countless rivers to cross in another, and the result will presently be a gravelled highway from Fort William to Vancouver through the southern parts of the provinces and a road from Winnipeg northwest to Jasper, and some day on to Prince Rupert and down to Vancouver, making a huge triangle that will tap all the cities of Western Canada.

At present there are north and south gravelled highways from Emerson to Winnipeg, and then north to Lake Winnipeg; a road from Edmonton to Calgary, south to the International Boundary, and north to Athabaska Landing, to which the Athabaska River makes a big southerly sweep before passing north again toward its ultimate goal in the Arctic Ocean. There its waters finally empty after some twenty-five hundred miles of wandering through and around mountains, past miles of forests and millions of tons of tar sands which some day will provide the covering for all weather roads throughout the prairies.

Already the traffic is so heavy on some of these prairie highways that the governments are worried over the necessity of incurring further capital expenditure for asphalt roads, since it is an economic fact that when the traffic exceeds a certain number of cars a day, it is more economical to have paver roads than

to pay the cost of upkeep on gravelled roads.

Each province has its own road policy, but in each the effort is to provide all-weather trunk highways which are of the best use to the people living within the province as well as to the tourist and also provide good market roads for those who have made their homes within that province. Each is groping for some system of conserving gravel highways, and each is hesitating over the tremendous capital expenditure of paving. But so universal is the traffic on Western Canada roads that if some of these oil schemes do not prove themselves shortly, it will be necessary to pave.—Montreal Herald.

Not Becoming Wealthy

So Far Lindbergh's Official Position Has Netted Him Nothing

Charles A. Lindbergh is not getting rich very fast from his position as adviser on aeronautics to the Department of Commerce.

Assistant Secretary MacCracken said Lindbergh has not drawn one cent in salary since his appointment about five months ago.

He is allowed \$25 a day when his services are sought by the Commerce Department. Otherwise he gets nothing. MacCracken explained that no problem had arisen which required Lindbergh's advice.

Winnipeg Newspaper Union

SMART BLOOMER DRESS

Printed linen takes its place in the mode and is used for a most unusual bloomer dress for the growing miss of 6, 8, 10, 12 and 14 years. The back of waist extends over shirred front, forming yoke effect. The short puff sleeves are a new style feature. Collar can be made in plain or scalloped outline. The attached two-piece skirt with smartly pressed plaits, allow plenty of freedom for the activities of youth. Pattern No. 821 consists of dress and bloomers. For the 8 year size, it requires 2 1/4 yards of 35-inch material with 1/4 yard of 18-inch contrasting. Printed sateen, chambray, tub silk, cotton broadcloth, checked gingham, printed crepe de chine and printed cotton foulard also smart. Price 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including smart ensembles, and cute designs for the kiddies.

Philanthropist

W. H. Askew, wealthy Laird of Ladykirk, near Berwick, who is devoting large sums of money for the purpose of enabling worthy British to come to Canada in agricultural placement, arranged by the Department of Colonization and Development, Canadian Pacific Railway. "Make good," said Askew to a large group of colonists whose movement he made possible, "and you will be giving me all the thanks I ask."

Trying To Develop Hardier Strawberries

Plant Breeders Are Now Turning To Wild Variety

All the strawberries in Canada and the United States and most of the world—that is, the cultivated ones—are descendants of two wild strawberries, one a native of the Pacific Coast, and the other a native of the eastern United States.

There are many other wild strawberries, however, that did not take part in developing our present kinds. In the untamed wild one may lurk some valuable trait that can be bred into our domestic varieties which may make them even more desirable than they now are. At any rate, plant breeders are turning to the wild sorts for improving the strawberry, especially to develop new types better adapted to such specific purposes as canning, preserving and candy making.

Would Care For Blind

The Manitoba government is anxious to have the old age pensions act extended to blind persons needing assistance. Hon. W. J. Major, attorney-general of that province, urged the extension on Hon. Peter Heenan, minister of labor. Mr. Heenan promised sympathetic consideration when in Ottawa.

Believed Fort Norman Region Offers a Great Oil Reserve Which May Be Used in Future

Educational Films

Excellent Films Supplied By the Government Should Be Shown

As for the other matter, the type of moving pictures presented to Canadian audiences, an interesting and valuable suggestion is made—namely, that the excellent films in possession of the governments—Dominion and provincial—which are at present available for exhibition in the schools, should be shown also to the general public. Whenever there is a suggestion of "educational" films, the answer is always made that the producers and theatre managers are catering to popular taste—that it is a case of supply and demand. But there is little doubt that the appetite for low-grade pictures grows by what it feeds on. The sentimental, nauseating rubbish which is served up to patrons has a vitiating effect, especially on immature minds. The suggestion made by Col. C. R. McCullough, that one of the local school auditoriums might be engaged for a weekly showing of these interesting government films has much merit; it should, at any rate, be possible to make suitable arrangements.—Hamilton Spectator.

Stubble Burning Warning

Extra Precautions To Be Taken Against Spread Of Fire

"Exercise care in stubble burning. Running fires cause damage to the property of others." This is the tenor of a province-wide educational campaign which has been instituted by the Fire Commissioner of Saskatchewan in an attempt to reduce the fire losses from stubble burning which have been abnormally high during recent years.

The Prairie and Forest Fires Act requires that the stubble to be burnt must be completely surrounded by a fire-guard not less than 20 feet in width, and the fire must be guarded by three adult persons. This law, in the future, is to be more stringently enforced.

Where combines or swathers have been used and the stubble is longer than ordinarily, the Fire Commissioner warns, extra precaution should be taken.

The best way to avoid tire troubles is to ride in a friend's car.

SHORT BUT TRICKY

No. 4, Cavell—230 yards, Par 3.

This hole on the Jasper Lodge Golf Course, Jasper National Park, Alberta, over which the Canadian and Western Canada Amateur Championships will be played from Aug. 19-24 this summer, is more difficult than it seems. The green is well trapped and the long driver is sure to find trouble.

The fact that the Western Canada Amateur also takes place over this course at the same time as the Dominion event, assures all golfers, no matter how high their handicap, of lots of competitive play.

The photograph shows the hole from No. 1 (championship) tee, and the panel is the hole in detail, with yardages to scale below it.

A small "cracking" plant of sufficient capacity to distil gasoline for the motor boats which ply the Mackenzie River during summer may be built this summer a short distance from the Arctic sea.

The Hudson's Bay Company, boats which leave McMurray and Fort Smith on their voyage down to the Arctic may carry the nucleus of this refinery. The company has investigated the feasibility of taking such a plant into the high north, and it is held probable that within the present year crude oil from Canada's highest north oil field will be supplying gasoline and other fuel for the various shipping and other operations in the north.

Just before the war the late Dr. T. O. Bosworth, well-known British geologist, visited the far north, making his way down the Mackenzie to the Arctic. He came back with news of possible oil structures near Fort Norman. Then came the war and it was not until 1919 that the Imperial Oil Limited, sent in a crew with a light drilling rig. As may be imagined, the transportation problem into this country was daunting.

On what was afterwards known as Discovery Range, fifty-three miles north of Fort Norman, the crew drilled the first well to a depth of 910 feet, at which mark they struck oil sand with a gas flow. This well flowed in "heads" or spasmodically, when enough pressure collected to force the oil to the surface.

Rumors floated up the river to the south of a big oil gusher and a rush for the field was started, men making their way in even during the winter months. The well actually did increase production to about 100 barrels of high grade crude oil after being deepened.

Imperial Oil, Limited, pushed its development work with enthusiasm and kept sending in new rigs and material over the 1,400 miles of wilderness between Edmonton and Fort Norman. One season they used airplanes to help them with their communications; in one season freight bills alone amounted to \$140,000.

Several dry holes were abandoned at other points along the river, but Discovery No. 1 increased production and Discovery No. 2 was drilled.

It is the opinion of many oil men that the Fort Norman region offers a great reserve of oil on which Canada may draw in the future. With mining development pushing towards the Arctic, it is not too much to predict that before many years ways and means will be found to bring the Arctic petroleum to market.

Fort Norman oil is 35.6 degrees Baumé gravity, with paraffin base and is extremely high in gasoline content. It remains fluid at 90 degrees below zero, having a natural temperature of 12 degrees above zero Fahrenheit.

Could Pool Resources

Frank: "Is it true that you are engaged to three other men besides me?"

Frances: "Why?"

"Well, I was thinking the four of us might raise enough by clubbing together to buy you an engagement ring."

"You look very sad."

"So would you be. I dreamed that I should die in a week."

"When did you dream that?"

"A month ago."—Moustique, Charleroi.

THE VACATION DELUSION

Another popular theory has been exposed as a delusion. A French writer vehemently refutes the common supposition that the way to rest is to do something else, to spend a day or a week doing anything that one does not do the rest of the year. This, he says, is only "getting tired another way."

Instead of a theatre or dance after a day of toil, this investigator into the causes and remedies for fatigue recommends repose, sleep, solitude, quiet and inertia. The rest cure he advocates for the tired business man is not golf, motoring, a sea voyage or two weeks at a shore resort. For such, if they really desire rest and recuperation and not merely a vacation, he prescribes a retreat far from the crowd, devoid of activity, the society of others and other disturbing influences.

Of course he is right. And the truth of the matter is that his theory has always been put to practical use. People who go away to rest don't delude themselves into thinking they obtain that needed reconstruction of mind and body by participating in sports and mingling with the mob. They seek out some quiet nook and strive with as little effort as possible to see, hear, speak and do as little as possible.

No time is more propitious than the present for removing some misunderstanding of that great American institution, the vacation. Though it destroys the institution itself, the pronouncement is here issued that the vacation is no longer used as a rest cure and is not necessary as such to the average worker. If there was ever a time when people went on vacations to rest after their labors, they now return from their vacations to rest after their labors.

EVERYONE SHOULD KNOW HOW

A child wading in a stream was swept off its feet. Its parents, brother and sister, rushing to the rescue, plunged into the water, as swimmers have dared to do since man discovered that he and stones were not brothers in the water. All were lost.

Two or three faltering swimming strokes would have made the boy safe. Without them the will of a Napoleon would not have helped him. The strength of Hercules, Mozart's genius and Poch's cool-headedness all combined in his mind, spirit and body would not have supplied the common skill to pull him a few easy feet through the water to safety.

Learning to swim is easier than learning to walk, and yet drowning accidents are quite as common during summer week-ends as motor crashes.

It is a father's job, either in person or by competent proxy, to see that the lesson is learned before that inevitable time when the child disobeys the parental injunction to stay away from the water when unaccompanied by an adult escort.

Unlearned in the art of swimming, man is, in the water, brother to the stones. Hundreds of men, women and children will pay with their lives this summer for their failure to make themselves kin to the fishes before venturing into deep water.

Mr. and Mrs. H. D. Brown and family of Moose Jaw are visiting friends in Didsbury.

LOCAL & GENERAL

Mr. Lorne Frey motored to Edmonton over the holiday.

Misses Laura and Orpha Liesemer are visiting at Sylvan Lake.

Westerdale annual sports day and picnic, Thursday, July 18th.

Mr. and Mrs. Ward Keith were visitors to Sylvan Lake on Sunday.

Miss Ruby Hunsperger is again on duty after her annual two weeks recess from bank duties.

Mr. and Mrs. Bert Fisher spent the 1st of July at Carbon and other eastern towns.

Mr. Cecil Adshead was a business visitor to the southern city on Tuesday.

Mrs. J. H. Lowrie and family are making Sylvan Lake their summer home this month.

Miss Grace Brubacher of the Mazeppa teaching staff is back under the parental roof.

Miss Florence O'Brien of Bindloss is a visitor in Didsbury this week.

Miss Bessie Clemens left on Sunday evening for Kimberly, B.C., and Chelan, Wash., for a holiday.

Messrs Russell Berscht and Ellwood Evans spent the first three days of this week at Banff.

Mr. Arthur Reiber, teaching near Stettler, returned to his home over the week end.

Mr. Frank Ingham sailed July 3rd on the Duchess of Atholl to Liverpool.

Mr. Lorne Good of the Lethbridge high school teaching staff is visiting at the home of his parents.

Mrs. J. W. Phillipson with Margaret and Donald left today for Prince Rupert where they will visit for about six weeks.

Miss Vada Manhart who has been teaching at Hanna is visiting at the home of Mr. and Mrs. J. V. Berscht.

Mr. N. Lammle returned last week from Waterton Lakes, where he has been spending a few days holiday.

Over the week end a party of town's fishermen motored to the mountain streams, and returned very much elated over their success.

A number of Didsburyites attended the Alberta Institute of Cooperation held at the Olds School of Agriculture last week.

Zane Grey's dramatic picturization of the west depicting the reign of "Killer" See "Lightning" at the Didsbury Opera House, Saturday, July 6.

Messrs Tom Johnson, Bert Cressman, Real Hawkes, Bob Eubank, Nyal Hunsperger and Alf Allen motored to Golden and Radium over the holiday.

The W.C.T.U. will meet in the Evangelical Church on Thursday, July 11 at 3 p.m. An interesting program has been prepared. Members and friends are cordially invited.

Mr. O. M. Bird of the High School teaching staff and Miss Alida Hugel of the public school staff are taking advantage of the teachers' summer school at the Capital City.

The story of a girl of the slums who taught a society wife the glory of giving. Alice Joyce, Marjorie Daw and Clive Brook featured in "The Passionate Adventure" at the movies, Wednesday, July 10.

Mrs. Coleman (formerly Herber) will hold an Auction Sale of all her household effects and also her residence, on Tuesday, July 23. Full particulars on posters which will be off the press this week end. J. W. Phillipson, Auctioneer.

To inform passing automobile tourists that Didsbury possesses such a thing as a tourist camp it would seem a good idea to have two signs more conveniently placed than the present orphan—one each at the south and eastbound approaches to the camp. Two others also might be erected, one each a mile or so from the north and south approaches to the town precincts advising to keep a lookout for a convenient tourist stopover.

**Innisfail Secures
Chance In Play-Off**

Innisfail made sure of a place in the Rosebud league play-off when they defeated Didsbury Thursday last on their own diamond, in a ten inning game. Mix on the mound for the locals allowed only one hit and no runs, in the first eight innings, while the local boys secured six hits off Freeman, but crossing the home plate only twice. Joe Thompson relieved Freeman in the eighth inning holding the locals to one hit—a three-base by Mix—and no runs.

The ninth inning was disastrous for Didsbury, Innisfail tying the score with two runs. In the final period Didsbury failed to reach first base while Innisfail secured two single hits, winning the game.

Olds plays here Monday night, the last league fixture here of the season.

Mrs. W. A. Austin and daughter Elizabeth left last week for a visit to the former's home, sailing July 2nd on the Empress of Australia for Southampton.

Mr. and Mrs. Fred Hyde and Miss Olive Hyde left on Tuesday for Kincardine, Ont., and other eastern points. They go via Fort William, sailing on the Great Lakes boat Keewatin, July 6th.

SUMMER SUNSHINE

Summer is nature's building season. We are learning how valuable the sun's rays are in preventing rickets and in enabling children to grow up strong and robust. Every opportunity possible should be taken to keep them out of doors in the months when the greatest amount of ultra violet rays reaches them. These rays do not pass

Never Again Say -

Is that all you paid for this . . . ?

Where did you ever find these . . . ?

Why, it costs me nearly twice that much!

But aren't they awfully expensive?

How do you ever manage so well on so little?

I wish I could do it.

READ the advertisements. Know what you want before you go to buy. Get the most for your money by knowing what manufacturers and merchants are offering.

Advertisements will keep you abreast of the times. They will enable you to spend the family income wisely. They will help you to live better at less cost.

Then—when remarks similar to those above are made to you, pass on this good advice, for all who want the best at least cost—*read advertisements.*

through window glass or through even the sheerest of clothing. For that reason, it is direct contact of the sunshine with the naked skin, which brings the benefit. So let the young people discard all superfluous clothing. The greater area upon which the ultra violet rays may fall, the better for the child. All may take the free sunshine cure.

GLIMPSES FROM THE PAST

20 YEARS AGO

Calgary was struck by a terrific lightning storm on Tuesday, July 6th. The only fatality occurred when Paul Mueller, 18, son of Mr. and Mrs. W. G. Mueller, Didsbury, was struck by lightning in the house where he resided. Seven other people were in the room with him at the time but were uninjured.

Died—On Monday, July 5, 1909, Jennie Laurie Adam.

15 YEARS AGO

Mrs. Norman Clarke and son Everard are visiting friends in Edmonton.

Didsbury baseballers were defeated 13-5 by Lacombe last week.

Mrs. S. Hehne, sister of Mrs. H. L. Sanderman and her daughter Mrs. Aldrich, and granddaughter Evangeline, of Hollywood, Cal., were visitors at the home of Mr. and Mrs. H. O. Sanderman.

10 YEARS AGO

A meeting of a few of the ratepayers of the town was held in the Opera House on Monday evening to discuss the question of more school accommodation.

Mr. R. C. Oldham returned on Sunday from a trip to Nebraska.

Mr. and Mrs. S. Tighe left the latter part of last week for a trip to the coast.

Mr. and Mrs. W. G. Liesemer and family have started on an extended auto trip to Spokane, Portland, Seattle and Vancouver.

LOCAL & GENERAL

Mr. and Mrs. J. McCloy motored to Banff on Sunday.

Mr. and Mrs. Cecil Studer and Mr. and Mrs. Grant Parks were visitors to Banff over the week-end.

Mr. and Mrs. H. Hawkes and son George left on Sunday for a visit to Nova Scotia.

Mr. and Mrs. Ball and daughter Ruth of Stettler were visitors with Mr. and Mrs. H. Reiber Sunday.

Mr. Alymer Liesemer who has been teaching at Macleod returned to Didsbury last week.

Mr. and Mrs. Roger Barrett and family left on Sunday by motor for Salt Lake City to spend a month's vacation.

Ten local cadets left on the noon train yesterday for Cochrane where they will spend a period in training.

Messrs. R. Ford and H. George, principals of the Public and High Schools respectively, are in Edmonton marking examination papers for the Department of Education.

a.m., Communion service, Rev. H. Clay in charge.

Every fourth Sunday, evening service at 7:30.

Special Courses At University Of Alberta

Two courses, one in Nursing, the other an Educational Course for school teachers, are available for the training of professional nurses.

Degree Course

1. A five-year course leading to the degree of B. Sc. in Nursing is offered. The preliminary educational requirements for this course are university matriculation or its equivalent. In this course the first two academic years are spent at the university, the third and fourth in residence at the hospital, and the fifth at the university. The degree course has a preliminary term of three months in the hospital at the close of the first academic session pending final acceptance of the student as an undergraduate nurse.

Diploma Course

2. A three-year course leading to the Diploma and the R.N. Preliminary is offered. Educational requirements for this course are Grade XI of the Province of Alberta or its equivalent. The diploma course has a preliminary period of six months in the hospital preceding final acceptance of the student as an undergraduate nurse. Classes are admitted to this course three times yearly, January 1, July 1 and October 1.

The connection of an undergraduate nurse with the hospital is terminable at any time for cause at the discretion of the Council of the School.

With respect to both diploma and degree course, the minimum age for entrance at the hospital is eighteen.

Registration

All young women desiring to register for courses in the University of Alberta School of Nursing ought, if possible, to apply in person to the Superintendent of Nurses at the University Hospital not later than Sept. 1st for the autumn term, Dec. 1st for the January term, and June 1st for the midsummer term of each year for students intending to take the diploma course, and not later than Sept. 1st for candidates intending to take the degree course.

Students are requested to bring their certificates of preliminary education with them at time of the personal interview, if these have not been admitted earlier, for consideration by the university admissions committee.

Further information about these courses may be obtained from the Registrar of the University, Edmonton, Alta.

Mr. and Mrs. Morgan spent Thursday of last week in Calgary.

Miss Florence Reiber of Calgary was a visitor at her home over the week end and joining her parents in a trip to Sylvan Lake Dominion Day.

Misses Ruth Brubacher, Ruby Klinck, Mildred Brown and Grace Scheer leave today for Victoria and other coast points for their holiday. While at the coast they will take in the cruise up the west coast of Vancouver Island on the C.P.S.S. Princess Norah.

Wash Away That Itch

With a Penetrating Antiseptic

Now you can stop burning itching skin torture. Apply the pure cooling liquid D.D.D. ITCHING STOPS INSTANTLY. The healing elements penetrate the skin and soothe the irritated tissues. Eczema, pimples, ulcers, rashes, all forms of skin trouble quickly yield to this famous antiseptic. A 35c bottle proves its merit or your druggist gives your money back. D.D.D. gives skin health. (Use D.D.D. Soap).

RUGBY NOTES

Rugby folks were particularly fortunate, in the choice of both the lay and the location, for their community picnic last Saturday. Once again the schoolchildren were all packed up in the Red truck, and taken to the picnic grounds at Westward Ho, on the banks of the Red Deer River, which is an ideal place for picnicing. A goodly crowd sat down to dinner, and the afternoon was devoted to sports of different kinds. A baseball game between the grown-ups and the youngsters resulted in a very decisive victory for the latter. Being a lovely warm day the river proved an attractive spot to everyone, and bathing suits were much in demand. All too quickly the time passed, and we very regretfully packed our baskets and set out for home, deciding meantime that this was the best picnic we have ever had.—Contributed.

C. H. Peters, representing the Chipman Chemical Co., Winnipeg, was in town last week end demonstrating a comparatively new weed killer in the interests of the local municipal district councils. A small test section across the road from Mr. Brusso's office will be watched with interest. The Tennis Club has also used the exterminator on the weeds and grass remaining on the courts, but it will be a few weeks before definite results are obtained.

A NEW SONG

"Well, Annie," said the Sunday visitor, "what did you learn at Sunday School today?"

"Oh, we learnt a new song, quite a pretty one!"

"Song? A hymn, you mean, don't you?"

"No, it was an auto song, 'I'm going home on high'."

1929
 1817

112 years

FOUNDED in 1817, the Bank of Montreal is now in its 112th year of financial service for the people and commerce of Canada.

In every place of importance throughout the Dominion, the Bank is represented by a fully-equipped Branch. It also has its own offices in Great Britain, France, the United States and Mexico.

Its facilities in all phases of domestic and foreign banking are unexcelled.

BANK OF MONTREAL

WORLD HAPPENINGS BRIEFLY TOLD

Newfoundland's recently authorized \$6,000,000 five per cent. loan was awarded to the Bank of Montreal on a bid of 96.25. The government regarded the terms as favorable.

Prince Charles, second son of King Albert, was fined 100 francs (about \$4), for not voting in the Belgian provincial election in accordance with Belgian law.

Caught between a conveyor and a mixer in the Flin Flon mine plant, Jacob Holt was dragged to his death. His clothing became caught in the bucket carrying device when he was working about the machine.

Some early moves looking to reduction of international naval armament are confidently expected in informed circles at Washington, to be made by the United States and Great Britain.

The Ontario Government's agreement with the Federal government on old age pensions was formally signed by Premier G. Howard Ferguson, and Hon. Peter Heenan, federal minister of labor. The act becomes operative November 1.

One of the largest diamonds found in the South African fields was recently brought to Kimberley from Barkley West for valuation. It weighed thirty-three and one quarter carats and sold for \$13,300. This is believed to be a record price per carat—\$400.

Baking tests of Garnet wheat, shortly are to be carried out in the United Kingdom, and will be observed by L. H. Newman, Dominion cerealist, who leaves from Montreal, on the Montrose. Mr. Newman may also go to Hamburg and other European grain markets.

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle for life and succumb to weakness. This preparation gives promise of health and keeps it.

New Yorks Are Common

Americans may believe there is only one New York, but England has three and Scotland one. England recently claimed a New York in Kent, Lincolnshire and Northumberland counties and immediately all good Scotchmen pointed to their New York on the western shores of Loch Awe.

Use Minard's for the rub down.

Most Obedient

Mamma: "And were you a nice boy at the party?"

Bobby: "Yes mamma."

Mamma: "You didn't ask twice for anything at the table, did you?"

Bobby: "No, I didn't, I asked once, and they didn't hear me, so I just helped myself."

Cramps Diarrhoea Pains in Stomach

Mr. Roy Lighthall, Milford, Ont., writes: "I became very ill; lost my appetite, had cramps, diarrhoea, and severe pains in my stomach."

"I purchased a bottle of and before I had taken half of it I was completely relieved, and have had no symptoms of the trouble since."

"I cannot praise 'The Extract' too highly, and will never be without a bottle of it in the house."

"It is pleasant to take and acts very quickly."

"My brother had the same experience with it as I had."

"Dr. Fowler's" has been on the market for the past 84 years; you don't experiment when you buy it. Price 50 cents a bottle at all dealers; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Channel Tunnel Plan Favored

Would Help To Solve Unemployment Problem In Britain

Construction of a tunnel under the English Channel to connect England and France by rail is one of the schemes which Rt. Hon. J. H. Thomas has his eye on in connection with his plans to solve the British unemployment problem. Mr. Thomas has been delegated by the new premier Rt. Hon. J. Ramsay MacDonald, to direct the new Labor government's work in dealing with the unemployment situation.

He is organizing a new government department of employment and is obtaining reports on a number of projects which might supply work for some of the men now unemployed as a preliminary to calling in experts from all the government departments.

With the aid of the experts he hopes to frame definite plans for road-building, housing development and railway reconstruction. At the same time he is not to forget emigration and the development of the Empire and the part they may be made to play in reducing the army of unemployed.

A Famous Field-Marshal

Viscount Allenby Has Had Distinguished Career As Soldier and Statesman

Field-Marshal Viscount Allenby celebrated his 65th birthday recently. He has displayed marked and outstanding ability in two fields—soldiering and statesmanship. At the outbreak of the Great War he assumed command of the Cavalry Division with the Expeditionary Force, and afterwards won undying fame as the conqueror of Jerusalem. Then as High Commissioner of Egypt in 1924 his firm attitude after the assassination of the Sirdar undoubtedly prevented a very ugly situation developing into positive disaster. His is a temperament which the Orient understood and appreciated. On the Western Front he was known as "The Bull."

Phosphates For Fertilizers

Manufacture Of Fertilizers On a Large Scale To Be Carried On In B.C.

The vast deposits of phosphates in British Columbia, to be converted into fertilizer by the Consolidated Mining and Smelting Company, will save the "wheat sick" parts of the grain belt in Western Canada, said C. C. Castle, of Victoria, formerly member of the Canadian Grain Commission, the other day. "The ally," he said, "The manufacture of fertilizer on a large scale will be the greatest salvation the western provinces have ever known. It will cause an increased yield; an earlier harvest, closer settlement and bring a reduction of taxation."

For Burns and Scalds.—Dr. Thomas' Electric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

Products Of Canada's Farms

The four leading items in the total agricultural production of Canada in 1928, valued in all at \$1,739,304,000, are: Field crops, \$1,099,781,000, dairy products, \$250,000,000; farm animals, \$197,850,000, and poultry and eggs, \$106,654,000. Last year was the first year for poultry and eggs to exceed \$100,000,000 in value. Since 1923 these have increased in value from \$62,000,000. Value of farm animals in five years has advanced \$72,000,000.

Corns are caused by the pressure of tight boots, but no one need be troubled with them long when so simple a remedy as Holloway's Corn Remover is available.

A Large Order

Mrs. High-Tighty: "And these are all the vacuum cleaners you have?"

Dealer: "Yes, madam, I have shown you all we carry."

Mrs. High-Tighty: "Well, I'm afraid they won't suit. I want one from the Louis XV. period to match my antiques."

Ambitious Project

Plan To Pipe Gas From Alberta As Far East As Winnipeg

W. S. Herron, oil operator, announces that a plan for piping gas from Alberta to Winnipeg, serving also Regina, Moose Jaw and Saskatoon, is under consideration. He says that the cost would probably be \$50,000,000 and that eastern Canadian and N.Y. capital is interested.

WHEN BABY IS WELL MOTHER IS HAPPY

The happy mother is the one whose baby is well—it is the laughing gurgling baby who always brings joy to the home. When baby is ill everyone in the home suffers—not only through worry over the little one but through loss of sleep—no one can find rest with a sick baby in the home. Thousands of mothers are happy mothers because they have found the way to keep their little ones well—or if sickness does come on suddenly, as it usually does with little ones, they have found the way to speedily bring the baby back to health again. Mrs. George Kech, Lindberg, Alta., is one of these mothers, and she writes as follows: "I am the happy mother of a seventeen-month-old baby girl. Baby is healthy and strong and sleeps well at night. I give her no other medicine but Baby's Own Tablets, and she just loves them. I am never without the Tablets in the house."

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels; sweeten the stomach and thus drive out constipation and indigestion and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Offered High Position

Clarence Chamberlain, trans-Atlantic flyer, wants a young woman secretary who will do her stenographic stuff in the air. He is willing to "iron out" the bumps and make the work as pleasant as possible. His frequent and long-distance flights, he says, necessitates the engagement of an air secretary.

A Forest Of 2,000 B.C.

Ancient Douglas Fir Standing At Bottom Of Lake In Oregon

An unexplored wilderness of Douglas fir trees stands upright on the bottom of Clear Lake, in Linn County, Oregon—probably green and flourishing in 2,000 B.C. These firs, we are told by John D. Guthrie, writing in American Forests (Washington), were growing in a little valley high up in the Cascade Range, when, about 2,000 B.C., or before, there were eruptions from many peaks along the crest. The peaks belched forth lava, and the molten stream spread out over thousands of acres. A tongue of this flow must have run into the little valley of the McKenzie, and almost filled it. Then:

"The heat may have killed the Douglas firs in the valley, or they may have been literally drowned by the rising waters. In any case, the river gradually filled the little valley above the lava dam, submerging the fir trees, and formed a lake about a mile long."

"The Douglas fir trees are still standing on the bottom of the lake. The waters are the coldest of any of the Cascade's lakes, and crystal-blue, so that the bottom, shining white with the volcanic ash of long ago, seems but a few feet below you. With the air excluded, these old trees have been perfectly preserved through all these centuries, and today the wood is readily identified. It is as sound as ever, with no breaking down of the woody tissues whatever, nor any evidence of infiltration of any kind."—Literary Digest.

To Protect Civilians

International Red Cross Commission Will Start World-Wide Propaganda

A world-wide campaign for the protection of civil populations against the future possibilities of aerial and chemical warfare is to be inaugurated soon by the International Red Cross Commission. The movement will take two forms—world-wide propaganda to acquaint civil populations with the dangers of aerial and chemical warfare and world-wide competitions for the perfection of new means of defense against such attacks.

"Talkie" Novels Now

People Can Enjoy Book Without Trouble Of Reading It

Talkie novels have come as the natural sequence to talkie movies.

The first talkie novel is a story "Artaban," by Andre Cayatte, and has been put up in a series of phonograph records, each record containing a chapter. The story is related by the author.

Several others are in preparation, but the plan has been changed by using men and women to recite the lines of the characters of the novel, to do away with "says she" and "says he."

Editors of the talkie novels predict a great future, principally because it will now be possible to enjoy a book without even the effort of turning every page.

"Nurse," said an amorous patient, "I'm in love with you. I don't want to get well."

"Cheer up, you won't," she assured him. "The doctor's in love with me, too, and he saw you kiss me this morning."

In The Locker Room

Minard's is the stand-by of those who take care not to suffer from stiffness and aching muscles.

WINDOLITE

The Improved
Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, F.O.B., Toronto.

Use WINDOLITE and let

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

The Desert Song

— BY —

VIRGINIA MORRIS

Copyright 1929 Warner Bros. Pictures, Inc.

"The Desert Song" is a Warner Bros. picture of this novel. It is based upon the story by Otto Harbach, Laurence Schwab, Oscar Hammerstein, 2nd, and Frank Mandel.

CHAPTER V.—Continued.

An hour later the Red Shadow received from his host the advice that the French girl was alone in the upper chamber. He found this room to be a gorgeous apartment lighted by great oriental lamps that burned live coals and suffused a weird effect. Margot was sitting on a low silk couch. Her dusty riding habit had been exchanged for a filmy chiffon skirt that revealed every line of her alluring body. A narrow pearl bodice took the place of a waist and her bare arms were braceleted with broad bands of precious stones. She was far more beautiful in eastern garb than the Red Shadow had ever seen her before.

"Why did you bring me here?" was Margot's first question when the Red Shadow entered. She arose from the couch and stood in a defiant attitude.

"Why?" he replied. "To teach you to love me—so fiercely that you could give up home and friends. Call it a mad dream, but mad as it is I'm willing to risk my whole future to make it come true!"

"Leave love out of it," she answered. "I hate you! I love Paul!"

But the Red Shadow knew better. With a final positiveness, he told her, "You—do—not—love—him! Come to me!"

His persuasiveness had not won her, for she shrank from him. "Tell me one good reason why you will not," he insisted.

"Why there . . . there are many!"

"Give me one!"

"Why I love . . . I love Pierre Birabeau. I know that I do. Once I dreamed of romance and adventure, but I've had enough of it. I want the quiet life that Pierre planned for me!"

The Red Shadow made an impul-

"HELPED ME WONDERFULLY"

Woman Strengthened by Taking Lydia E. Pinkham's Vegetable Compound

Port Colborne, Ont.—"After having an operation, I was very miserable, weak, nervous and very near unfit to work. I saw Lydia E. Pinkham's Vegetable Compound advertised and tried it and believe it helped me wonderfully. I have no weak spells any more, the pains have left me and my nerves are much better. I feel safe in saying Lydia E. Pinkham's medicines have helped me wonderfully."—MRS. WM. H. BEECHTELLER, Box 143, Port Colborne, Ont.

W. N. U. 1790

though she felt herself madly infatuated with the outlaw, she believed that sincerity had prompted her to tell him she longed for the safety that life with Pierre would mean. Her heart was a maze of contradictions but, after all, nothing could matter much now.

She did not hear Captain Paul Fontaine enter. He startled her when he sat on the arm of her chair and tried to take her hand.

"Please, don't, Paul," she protested wearily.

Fontaine's face flushed with jealousy. "I know why you're not happy. It's because the Red Shadow is in danger. You've fallen in love with him."

Margot turned her head and looked at him defiantly. "What if I have?"

Their quarrel was interrupted by the arrival of General Birabeau. "Paul, the command to take the Red Shadow a prisoner is changed. He is not to be brought in alive!"

Fontaine smiled but Margot jumped to her feet and exclaimed, "But the man you're after is alone and unarmed! You cannot be cowards enough to kill him!"

"Go, Paul, you have heard my orders!" insisted the General. But he was not devoid of sympathy for the girl, for as his subordinate left, he turned to her: "Margot, I advise you to give up this dream of romance. It has caused you enough heartache."

Thinking it was kinder to leave her alone, he disappeared silently to the garden. The girl resumed her vigil, scanning the desert spaces she knew not for what. Afternoon darkened to dusk and dusk darkened to evening. Then, out of the stillness, cries of the returning soldiers were heard. A moment later Captain Fontaine burst into the room and the instant that Margot saw his face she knew that his mission had been successful. He was followed by General Birabeau, who asked, "Tell me what happened?"

"We killed him!"

"Who? Which one of the soldiers?"

the commandant enquired.

Paul Fontaine hesitated. "None of our soldiers. But the last man you would ever suspect."

The door opened and Pierre Birabeau stood before them. Over his arm was the cloak and the mask of the Red Shadow and his hand held the outlaw's broken sword. Gradually his father realized the daring of the son he had almost despised. It was he who had killed the dreaded enemy. In a rush of emotion he put his arms around the boy and held him close. Then another realization slowly possessed him, for he whispered so that only Pierre could hear, "You were bravest when you refused to fight!"

That evening Pierre Birabeau was the acknowledged hero of the post. Margot alone failed to congratulate him. The General, bursting with pride, at the bravery of his own boy, urged him to tell the girl the details of his amazing exploit. As he left the room he saw Pierre put his arm around Margot Bonvalet—and he had never dared that before!

"Margot—" Pierre began.

"Please, Pierre—don't tell me anything more. I—I want to be left alone."

"But answer just one question, Margot, and then I will go. Did you love this man very much?"

There were tears in the girl's eyes.

"Yes, I loved him—as I never will love anyone else."

Pierre did as he had promised. He went quietly from the room. When she knew that she was alone Margot gave way to all the despair that had been stifling her since the night before, since she started back over the desert, leaving the Red Shadow to face the horrible punishment he could not escape. Her own sobs prevented her hearing the door through which Pierre went open again. She felt a hand on her shoulder. At first it seemed impossible—it was the distorted imagining of her broken heart. But when she felt his lips against hers she knew that it was true. The Red Shadow—her lover—was there, dressed in his scarlet burnoose, his face hidden by the mask he had always worn.

Then, after that long embrace, she lifted the mask. And she knew that the greatest romance of all was ahead—the tempestuous love of the Red Shadow and the protecting tenderness of Pierre.

THE END

Interesting Relics Found

Discovery Made At Old Settlement On Saskatchewan River

A discovery of great prehistoric interest has been made at Brosseau, an old settlement on the north bank of the Saskatchewan River, near Spedden, the discovery consisting of a large quantity of articles of warfare and household use.

A short time ago, as John Ames was plowing on his farm at Brosseau, the sound of steel against steel attracted his attention. On investigating he discovered a barrel shaped cavity filled with axes of many patterns, tomahawks, big hunting knives, table knives and forks, flints, arrowheads, locks, keys, etc.

The locks are of the type known as stock locks, and these and the keys are of enormous size compared with the modern kind. Many theories are afloat as to the reason for burying these articles in this remote place. Many years, perhaps generations, must have elapsed since this miscellaneous collection of articles were hidden away. That they were enclosed in a barrel is quite evident from the shape of the hole and from the fact that though the wooden staves have long since turned into dust, some of the iron hoops, rusted and worn, still remain. A few theories in connection with this remarkable find are: That the articles were being conveyed to a Hudson Bay post, when owing to some accident or disaster, the factor or men in charge of them had to cache them in this spot; or that they may have been taken from the post at Frog Lake, at the time of what is called the Massacre, by Indians, who fearing pursuit, buried them where they were found.

Little Helps For This Week

"He giveth power to the faint, and to them that have no might He increaseth strength."—Isaiah xl. 29.

It is not, Lord, that I have fearful

grown To walk the way I must; But oh! the path is steep that I must tread,

And, often in the dust.

I fall, my feet are bleeding from the stones, And all my tears are vain; Forgive, I pray, dear Lord, and give me strength;

Thy strength to rise again.

Whether we stumble, or whether we fall, we must only think of rising again and going on in our course. God never makes us feel our weakness, but that we may be led to seek strength from Him.—Fenelon.

It is impossible for that man to despair who remembers that his Helper is omnipotent.—Jeremy Taylor.

Mathematical Genius

Six Year Old Danish Boy Has Distinguished Scientists

Danish scientists have been dumfounded by the mental antics of a six-year-old mathematical genius, Paul Larsen, whose father is a modest tailor in the village of Hvidovre. On a recent visit to Copenhagen the clubby little fellow multiplied figures with products as high as 10,000. Most of his answers were given in less than ten seconds, and if the calculations of his inquisitors may be relied upon, all of them were accurate. According to his proud father, Paul has displayed his ability at arithmetic since he passed his fourth birthday, and no one has ever taken particular pains to train his mind in that direction. When he is not performing for curious visitors, the child spends his time playing about the streets of his native village.

ITEMS OF INTEREST

Prices averaging approximately \$20 per acre were paid for the lands comprising the Indian Reserves adjoining the towns of Berwyn and Fairview disposed of on Saturday last by the Department of Indian Affairs. The highest price recorded was \$40 per acre paid by a Saskatchewan buyer for three quarter sections in the Beaver Reserve near Fairview. Widespread interest had been shown in this sale and a number of parcels were secured by buyers from various parts of the United States and Canada.

Applications will now be received from those eligible for assistance under the terms of The Old Pensions Act, it is announced by Alex Ross, Chairman of the Board. Application forms are available for all persons desiring to apply for pensions and arrangements have been made by the Board whereby applicants will be enabled to do so with the least possible difficulty. In rural districts applications will be received by the secretary-treasurer of the municipalities and in cities of Calgary, Edmonton, Red Deer, Medicine Hat, Lethbridge and Wetaskiwin applications will be dealt with the civic officers. In unorganized districts forms may be secured from the office of the nearest detachment of the Alberta Provincial Police.

Cards of Thanks

Miss Anna Mueller desires to thank all those who came to her assistance and rendered such effective work in extinguishing the fire at her residence Tuesday evening last. 27

W. A. AUSTIN,
Secretary-Treasurer.

To Honor Jeanne D'Arc in Old Orleans

(235)

ORLEANS, AND STATUE OF JEANNE D'ARC

JEANNE'S HOME, DOMREMY

Orleans, that historic town in north central France, will be the scene this year of thousands of Canadians and Americans of French descent, for 1929 commemorates the 500th anniversary of the deliverance of the city of Orleans by the martyred Jeanne D'Arc, probably the greatest heroine in history, who was burned at the stake by the English because they believed she practiced witchcraft. So great was her influence with the army of France that riding at the head of some 4,500 men she succeeded in entering Orleans on the 29th of April, 1429. So inspired were the Frenchmen under her that after stubborn resistance the

English finally became discouraged and evacuated the city. It is admitted that the extraordinary pluck and sense of leadership of the "Maid of Orleans" was responsible for the French victory.

To commemorate Jeanne's heroic exploit, a series of civil, military and religious fetes will be held on the 7th and 8th of May, including additional events, such as a tournament of jousting, after the fashion of knights of old; in which mounted warriors in all their plumes and armor will rush at one another with tilted lance to gain the favor of the "ladies fayre" witnessing the contests. Pageants representing French history of the past five centuries will have a place on the

15-day programme, and arrangements are already being made to accommodate the heavy influx of expected tourists.

Anticipating the desire of many French-Canadians and Americans of French origin to visit the ancient city of Orleans during the festival period, several steamship companies have arranged their sailings so as to include arrivals in France in time for the pageant. The Canadian Pacific Steamships, for instance, have assigned the "Empress of Australia" to sail from New York, April 17; the "Metagama," from Saint John, N.B., the same day, and the "Montcalm" from the same port, April 24th.
